

The Little Giant Velocity is a multi-use ladder system made up of three major components: one inner ladder assembly and two outer ladder assemblies that telescope over the inner section. The inner and outer assemblies work together with the hinge locks and the Rock Locks to adjust the ladder into different lengths and positions, including:

1. Extension
2. A-Frame stepladder
3. Trestle-and-plank scaffolding system (sold separately)
4. 90-degree (only used against a secure wall)
5. Staircase

# Velocity™
