Chemical Spill Prevention and Control

- Thicker side border and central load-bearing structure is very strong, which can firmly carry fully- loaded oil drums, chemical barrels and other storage containers and equipment.
- Polyethylene material, anti-UV, anti-rust, anti-corrosion, suitable for most chemicals.
- Orange anti-skid gratings, it will not rupture at full load, and the gratings are removable, easy for rapid treatment of liquid spill.
- The tray can use forklift, platform can spill by leaking into sheng workstation.
- Help to keeping the floor dry to avoid slip and fall
- All sheng drip tray and platforms can be nested stack , ensure orderly storage and leakage prevention of oil drums and chemical barrels
- In line with the regulations of EPA 40 CFR 264.175 of the U.S. Environmental Protection Agency (EPA) and the regulations of Spill Prevention and Control Act (SPCC) as well as U.S. NPDES.

2-drum spill pallets with stackable structure save space and transportation costs

Hexagonal drain plug facilitates drainage

2-drum and 4-drum spill pallets with stackable structure save space and transportation costs

2-drum and 4-drum spill pallets have forklift slots for convenient forklift operation to improve efficiency (*forklift overload prohibited)

Hydraulic carrying vehicles can also be used to move pallets, which is more convenient

Poly spill pallet ramps make it easier to move large articles
