

Poly Spill Pallet(4 Drum)**SPP104-2**

Acquired CE Certification, comply with the regulations of EPA 40 CFR 264.175 of EPA and SPCC as well as U.S. NPDES.

Modular PE Spill Pallet

The PE spill pallet produced by SYSBEL is HDPE injection molded with precision moulds and therefore robust and reliable. The PE pallet can prevent leakage of most chemicals, including acids, alkalis and other highly corrosive substances, thus making it more suitable for storing oil drums, drums of chemicals and other containers.

The PE pallets comply with relevant standards of EPA and each country. They contribute to environmental protection during normal use by comprehensively reducing the risk of water environment and soil pollution.

By adopting the reinforced structure design, the spill deck is featured with high load bearing capacity, high safety and high stability. The pallet accurately restricts the gratings on the periphery, thereby facilitating easy installation, removal and cleaning of the gratings. Meanwhile, the gratings for PE pallets are highly robust and corrosion resistant and have undergone surface roughening to effectively enhance surface friction, thus ensuring stable storage of drums. Moreover, holes in the gratings can effectively avoid possible accidental splash of dangerous chemicals during filling, subpackaging or storage.

The pallet has fork pockets 550 mm and 650 mm wide lengthwise to facilitate operations by the customer. With stacking restrictions on four sides, multiple pallets can be accurately stacked and packaged for transport, which not only facilitates transfer with forklift but also saves space and transport costs as far as possible.

There is room reserved for drain hole on the pallet, where hole can be made and drain valve installed according to local laws, making it convenient for customers to use.

Product features:

1. Comply with requirements of EPA, SPCC and NPDES standards and regulations.
2. The HDPE injection molded PE spill pallet, featured with high strength, reliability, load bearing capacity, safety and stability, is suitable for the storage of various containers.
3. Since PE is corrosion resistant, it can be used for storing oil drums and containers for storing chemicals, batteries and other hazardous substances and prevent possible chemical leakage incurred hazards.
4. Seamless structure design eliminates leakage and can accommodate full leakage of 70 GAL liquid.
5. It is easy to install, remove and clean.
6. There are fork pockets on the bottom to facilitate transport.

Modular PE Spill Pallet

Product	Capacity (Gal/L)	Material	Color	Load Bearing Capacity (kgs)	Overall Dimensions (LxWxH/cm)	Package Size (LxWxH/cm)	Configuration	Model
Modular PE Spill Pallet	70/265	PE	Yellow/black	3000	132×131×30	132×131×30	Grating*1 Pallet*1	SPP104-2

Chemical Spill Prevention and Control

- Thicker side border and central load-bearing structure is very strong, which can firmly carry fully- loaded oil drums, chemical barrels and other storage containers and equipment.
- Polyethylene material, anti-UV, anti-rust, anti-corrosion, suitable for most chemicals.
- Orange anti-skid gratings, it will not rupture at full load, and the gratings are removable, easy for rapid treatment of liquid spill.
- The tray can use forklift, platform can spill by leaking into sheng workstation.
- Help to keeping the floor dry to avoid slip and fall
- All sheng drip tray and platforms can be nested stack, ensure orderly storage and leakage prevention of oil drums and chemical barrels
- In line with the regulations of EPA 40 CFR 264.175 of the U.S. Environmental Protection Agency (EPA) and the regulations of Spill Prevention and Control Act (SPCC) as well as U.S. NPDES.

2-drum spill pallets with stackable structure save space and transportation costs

Hexagonal drain plug facilitates drainage

2-drum and 4-drum spill pallets with stackable structure save space and transportation costs

2-drum and 4-drum spill pallets have forklift slots for convenient forklift operation to improve efficiency (*forklift overload prohibited)

Hydraulic carrying vehicles can also be used to move pallets, which is more convenient

Poly spill pallet ramps make it easier to move large articles
